America Vs. Europe in Industry 1921 the eu single market and the opening up of eastern europe offer a chance to create a truly pan european market economy in this respect many lessons can be learned from early 20th century developments in europe bearing this in mind the authors analyze the fragility of international trade financial investment and foreign relations in and across europe from both a contemporary and historical perspective in a period of increased migration and higher capital mobility major oecd countries are faced with such issues as monetary integration the role of banks and the requirement for structural adjustment even more complex is the integration of russia policymakers and business community alike are presented simultaneously with unique opportunities and unique challenges with old and new pitfalls looming

Report on the Industry and Materials Committee to the Economic Commission for Europe 1959

The Coal Industry in Europe 1960

The Pulp and Paper Industry in Europe 1954 this text focuses on European industry and related EU issues incorporating data from all 15 member states and discusses the legal framework within which European firms operate it offers broad coverage of different theoretical approaches such as neo-classical, Austrian, Schumpeterian and Marxist traditions the authors also recognize the importance of geography in their attention to local, regional and global factors in industrial organization

European Economic Integration as a Challenge to Industry and Government 2013 12-14 the main objective of this book has been to carry out research into the definition of industrial policy and its goals, to evaluate previously introduced policies and instruments and to identify the future challenges for and features of a modern EU industrial policy a modern industrial policy is seen as a non-traditional policy towards the industrial sector based not necessarily on only the elimination of market failures within the sectoral and/or horizontal approaches but rather on the expanding the scope of industrial economic activities within the framework of both the pre and post-fabrication stages the book targets three market segments: academics, policy and decision makers at the EU, national and regional level as well as business practitioners it includes a wide-ranging analysis of different spheres of industrial policies conducted within the European Union making it of interest to an international audience each chapter also offers detailed, valuable comments as well as conclusions that can be generally applied ensuring the book's universality the book presents the results of a research project conducted in the Collegium of World Economy at the Vrije Universiteit Amsterdam school of economics

The Economy of Europe in an Age of Crisis, 1600-1973 1910-29 *inhaltsangabe* abstract since the adoption of the single European Act (SEA) in 1986 more and more competencies have been transferred from member states to decision makers in Brussels beside the objective of the completion of the single market the scope of community policies has widened to political co-operation, technological development and social policy in addition the powers of the European Parliament were strengthened and qualified majority voting was introduced for decisions related to the completion of the internal market since the summits of Maastricht and Amsterdam European integration has further gained in momentum national governments have again handed over sovereignty to the European level Jacques Delors' famous quote that 80% of regulations impacting on the economic sphere were decided in Brussels today demonstrates the shift of competence within the last 15 years Brussels has become an important centre of power this transference of power to the European level also has affected the behaviour of interest groups before 1986 it usually was sufficient for a group to lobby the own national administration in order to influence regulations the main function of European interest group organisations at the time was on the one hand to monitor events in Brussels and report them back to their member federations on the other hand they formed a transnational network for the exchange of information the growing power of European institutions and the strengthening of the supranational element within the European Union required interest groups to broaden their participation in the European decision-making process in addition the technical problems regarding the realisation of the internal market e.g. harmonisation of services, standardisation of products etc. has triggered off an enormous demand for technical input on the side of the European institutions since the adoption of the SEA thus interest groups have proliferated new groups with new interests have emerged long established organisations have increased their financial and personnel resources after Washington D.C. Brussels has become the second biggest boomtown for lobbying activities in 1992 the Commission has estimated that approximately 3000 special interest groups with a total of 10 000 lobbyists try to influence the institutions of the European Union the directory of interest groups lists 891 European peak organisations beside these Eurogroups a myriad of other forms of actors all trying to get

The Influence of Business Associations in the European Decision Making Process 2006 01-20 this text analyzes the impact of culture across the European continent shedding new light on those countries with a rich and famous heritage such as Italy and France but extending the study to newer forms of creativity

Poverty and Capitalism in Pre-industrial Europe 1979 the European Green Deal aims to make Europe the first climate neutral continent by 2050 this is not going to be an easy journey to be successful the

green deal will have to foster major shifts in the European industrial structure including transitions from fossil fuels to renewable energy and from combustion engine cars to electric cars shifting economies from brown to green would be a major historic socio-economic transformation in this context of broad paradigmatic change for European industry a green industrial policy will be fundamental to Europe's climate change ambitions but what is green industrial policy what market failures must it address unlike traditional industrial policy green industrial policy must be directed to twin goals of climate protection and social welfare green industrial policy initiatives in the European Union so far however have been piecemeal and fragmented this blueprint examines how past mistakes can be avoided and how the EU can develop a coherent green industrial policy that will serve the goals of the European Green Deal

The New Industrial Policy of the European Union 2016-10-08 this book explores the rise size and shape of the European fitness industry by using harmonised data as well as in depth analyses of national surveys in fifteen European countries following an introduction to the socio-historical and conceptual aspects of the collection presents the scope of fitness as a business and participatory activity furthermore both economic and governance issues as well as community and supply angles are considered drawing on this unique material the book will appeal to students and scholars of sport business sport economics sport management and social sport sciences but also to administrators policymakers and entrepreneurs in the international and national sport and health community

The European Union and National Industrial Policy 1996 twenty nine collected essays represent a critical history of Shakespeare's play as text and as theater beginning with Samuel Johnson in 1765 and ending with a review of the Royal Shakespeare Company production in 1991 the criticism centers on three aspects of the play the love friendship debate

Industrial Economics and Organization 1996 in front of us lies a rather unique study unique in respect of both its initiative and its set up this study is the result of a private initiative of an international organization of management consultancy firms it is the first time that such a broad international study was undertaken jointly by individual consulting firms in many different countries moreover the method used can be characterized as from the bottom up representatives of almost 100 organizations in seven European countries were interviewed by seven individual management consultancy firms on the basis of their own reputation and contacts not only the well known multinationals in the information and communication industry participated but also medium sized and small companies as well as government agencies the study focuses on one sector of industry that is considered to be of prime importance for employment in Europe the information and communication industry it is generally assumed that important instruments for the stimulation and strengthening of Europe's position in this field are reduction of competition within Europe better coordination of R & D efforts improved harmonization of rules standards and regulations better coordination and education programmes increased stimulation and guidance by governments this study puts these assumptions to the test it assesses the state of the art regarding these instruments and the actions needed to improve the present situation

Chemical Industry in Europe 1958 in worthy efforts Catharina Lis and Hugo Soly offer an innovative approach to the history of perceptions and representations of work in Europe throughout classical antiquity and the medieval and early modern periods

The Fibre Building Board Industry in Europe 1956

American Industry in Europe 1976 the industrialization of food preservation and processing has been a dramatic development across Europe during modern times this book sets out its story from the beginning in the nineteenth century when preservation of food from one harvest to another was essential to prevent hunger and even famine population growth and urbanization depended upon a break out from the biological ancien regime in which hunger was an ever present threat the application of mass production techniques by the food industries was essential to the modernization of Europe from the mid nineteenth century the development of food industries followed a marked regional pattern after an initial growth in north west Europe the spread towards south east Europe was slowed by social cultural and political constraints this was notable in the post second world war era the picture of change in this volume is presented by case studies of countries ranging from the United Kingdom in the west to Romania in the east

all illustrate the role of food industries in creating new products that expanded the traditional cereal diet of pre industrial europe industrially preserved and processed foods provided new flavours and appetizing novelties which led to brand names recognized by consumers everywhere product marketing and advertising became fundamental to modern food retailing so that europe s largest food producers danone nestlé and unilever are numbered amongst the world s biggest companies

Europe's Industries 1983 a combination of rigorous analysis and case material this book is an essential guide to trade and industry developments in central and eastern europe its scope is wide encompassing globalization the business strategies of mncs agriculture services and the dynamics of innovation it also considers the trading relationships of these countries with russia as well as the influence of trade on democratisation of states formerly belonging to the ussr

Trends in economic sectors 1954

The Competitive Strength of the Information and Communication Industry in Europe 1983-06-30 this timely new book explores europe s role in this evolving environment it argues that on the one hand in terms of sheer numbers the role of the manufacturing industry in the eu is on a par with other major global economies however the book also states that europe falls short of its global competitors the usa in particular in terms of its involvement in the most innovative manufacturing sectors the volume therefore argues that this creates the opportunity for a new european industrial policy

Industrial Productivity in Europe 2012 why has european growth slowed down since the 1990s while american productivity growth has speeded up this book provides a thorough and detailed analysis of the sources of growth from a comparative industry perspective it argues that europe s slow growth is the combined result of a severe productivity slowdown in traditional manufacturing and other goods production and a concomitant failure to invest in and reap the benefits from information and communications technology ict in particular in market services the analysis is based on rich new data including the eu klems growth accounting database and provides detailed background of the data construction as such the book provides new methodological perspectives and serves as a primer on the use of data in economic growth analysis more generally it illustrates to the research and policy community the benefits of analysis based on detailed data on the sources of economic growth

European Engineering Industry 1950

Industrial Policy in the European Community 1976 this textbook examines changes in industrial organization in britain germany and france from the perspectives of economic sociology and political economy it covers the roles of the finance industry nexus corporate restructuring the impact of small medium firms and other factors

America Vs. Europe in Industry 2015-08-31

Environmental Policy and Industrial Innovation 1995

Creative Industries and Innovation in Europe 2013

Banking, Trade and Industry in Europe 1997-05-15 the structure of european industry is a collection of essays on the economic organization of industrial sectors in europe which may serve either of policy makers in business and in government and staff and students at universities the first group increasingly needs a focus on longer term developments of european industry now that the positive growth effects of the economic integration of the sixties have worn off restructuring is the current catch word and nobody can deny the necessity and urgency of the task but it has become a day to day affair and there may be a loss of perspective the second group is growing up in an international environment and should be equipped accordingly many faceted tasks are involved with serving either depending on the problems which differ according to industries and here the bewildering complexity of the european industrial scenery strikes some of these industries are old fashioned some are new some are national in orientation some have integrated some have a competitive structure some are cartellized or heavily concentrated some have been interfered with by national governments others were free from such policing etc moreover a number of industries show various combinations of these and other facets at the same time

Toward the Modern Economy 1988 an account of the rise of banking since the middle ages and its place in the modern international economy first published in 1997

The Rise and Size of the Fitness Industry in Europe 2020-10-01 not only are European industries shrinking and experiencing diminishment of their capability to add value but Europe has lost more than a third of GDP which had been primarily based on manufacturing and it suffers the consequences in high unemployment and weakened state finance. This book is intended as a significant contribution to the ongoing European discussions after the economic crisis and the economic problems in many regions. It is meant to enrich actual political dialogues for overcoming the crises by activating new potentials of high added value as such it seeks to provide the necessary orientation for enacting fundamental changes of business models and factory capabilities in order to meet the challenges of the global economy and minimizing environmental impacts. It also opens perspectives for enterprise strategies and for further research topics. Concrete recommendations are made for fields of action and future development towards achieving a sustainable industrial sector in Europe. Towards the re-industrialization of Europe is based on megatrends, societal challenges and objectives for factories development focused on the realization of goals by 2030. The treatise addresses four major topics of the European strategy in manufacturing: manufacturing in the urban environment, green manufacturing, manufacturing in the value chain and manufacturing in the age of knowledge and communication. One enabler of this strategic orientation is implementation of holistic manufacturing systems which reflect manufacturing as a social-technical system that has to be innovated, optimized and adapted to the future requirements by implementation of enabling technologies and human skill. The public infrastructure and reviving industries must also be able to support the strengthening of the economy through collaboration in research and education.

The Food Industries of Europe in the Nineteenth and Twentieth Centuries 2016-03-16 this book analyzes growth at the total economy and industry level from an international perspective providing unique cross-country comparisons. The authors focus on the EU 25 countries but also include the US, Japan and Korea. Chapters explore growth patterns from a long-run perspective although greater attention is paid to the period of expansion from 1995-2007 and the post-2008 period of crisis. Each contribution builds on a common methodology based on a detailed database providing a high degree of disaggregation with respect to the industries and factors accounting for growth. The role played by ICT is expertly emphasized. In particular, the different paths followed in the US and the EU. This topical book will prove to be an unrivaled source of comparative data for academics, practitioners and policymakers alike.

American Industry and the European Immigrant, 1860-1935

Industry, Services, and Agriculture 1992 for centuries states have attempted to increase their national wealth and power by protecting and promoting certain privileged enterprises. Since the 1960s this phenomena has accelerated with the emergence of national champions, firms socially selected and promoted by governments to carry the national flag into the internationally competitive arena. This volume focuses on how European national champions have fared in an increasingly globalized industrial context after setting the four national policy contexts of France, Germany, Britain and Italy. It considers four major industrial sectors: comparatively, electricity, aerospace, air transport and telecommunications. It goes on to examine binational collaboration involved in the Channel Tunnel project. It concludes with an assessment of the increasing impact of the European Union on Europe's national champions as they lose their national identity and monopoly status and become Europeanized, globalized and hybridized.

A Green Industrial Policy for Europe 2020-12-17 by relating economic changes to the political backdrop of the economy of Europe in an age of crisis. 1600-1750 describes and analyzes the economic civilisation of Europe in the last epoch before the industrial revolution. The author makes a special effort to apply economic reasoning to the economic forces of the period and challenges some longstanding opinions. What was and was not important in explaining economic performance. The significance of this study rests in its identification of the ways a traditional society developed its economy despite the absence of the growth factors of the nineteenth century. The approach is consciously comparative. Problems of interpretation are identified. Research not yet available elsewhere is incorporated into the text and examples are drawn from minor as well as major countries in Western and Central Europe. Topics dealt with include the development of agriculture and industry, foreign and regional trade, urbanization, a study of demand, explaining economic growth, the bourgeoisie and the state.

The New European Industrial Policy 2015-05-25 how can policy makers pursue environmental goals while simultaneously keeping the burdens on industry to a minimum why does innovation play the key role in this balancing act and what are the implications for the development of sustainable industrial societies book examines the evolution of environmental policy in 6 oecd countries through numerous examples contrasts the widely varying political and regulatory styles and their consequences for innovation two industry specific case studies provide a transnational perspective on the co evolution of technology and environmental policy the book concludes that innovation can be successfully harnessed by setting clear long term environmental goals and ensuring that regulatory instruments are grounded in flexibility dialogue and trust

The Structure of European Industrial Regions 2013-11-20 european and american authors discuss the european community s 1985 far reaching design for regional integration
